

CHICAGO WHEAT ADVANCES

The Anti-Options Bill Scare Weakened and Bullish News Ruled the Market.

Partridge by Flooding the Pit Causes a Slow Reaction, Which, However, is Not Sufficient to Wipe Out Much of the Gain.

TRADING AT CHICAGO.

English Speculation Jackson Makes the World's Crop \$40,000,000 Bushels Short.

CHICAGO, Feb. 13.—The wheat market was rather strong most of the day. The news was mostly bullish and the buying was at times quite sharp, though largely professional. The anti-options bill now pending in Congress was less of a factor in the trading than it has been for several days past, as the impression seems to be gaining ground on the board that it will not become a law, at least not in its original form. Cables opened higher and strong, Liverpool being 1/2 up and private services from Paris reporting a decided up turn, after a continued crop damage report. A Paris cable forwarded by a New York firm said: "Crop damage not exaggerated; plant dry and dead." The sea-board and interior markets all started higher and for a time there was fairly active trading here. The buying orders seemed to come chiefly from New York and were executed through McMillan, Foster-Martin, Irving and "Cash" Clifford. The selling was cautious and showed a cover crop of the market. For a time the market maintained itself stably, may selling from 90 1/2 to 91 1/2, and held for a considerable time at 90 3/4 and 91. Then Partridge began to sell and seemed determined to fill up the crowd. For a time offerings were readily absorbed, but finally the price began to yield. This was the signal for some of the early buyers to begin unloading, and the weakness increased. Then the crowd began to suspect that New York was bulling the market to get a narrow spot to sell on. The trade began to show nervousness, and, on the free offerings, gradually sold. The market was then a reaction, however, there was a reaction, and may closed strong at 91 1/2. The week's exports decreased 1,100,000 bushels in comparison with the previous week, and the available stock showed a decrease of 340,000 bushels. The sea-board clearances for the two days were 1,100,000 bushels, from Liverpool that H. K. Jackson, the well-known English statistician, had estimated that the wheat crop of the world was \$40,000,000 bushels short of the requirements had a strengthening effect on the market.

Corn was quiet and weak; the demand was rather sluggish, and, as some large lots were thrown on the market, prices yielded some. Sibbey was said to have sold on a large lot of long corn bought on the recent break, and the trade was too small to take without causing some depression. May opened a little higher, at 45 1/2, in sympathy with the strength in wheat and because of an advance in the price of feed. It worked slowly down to 44 1/2, assisted by large estimated receipts of Monday, but rallied in the last hour with wheat and closed steady at 44 1/2.

Oats were dull and easy, closing with a loss of 1/2.

The receipts of hogs were light and prices steady. Hog products opened firm in sympathy with wheat and advanced slightly. They weakened and closed lower, but gained a point and a half, with ribs and hams unchanged.

Estimated receipts for Monday are: Wheat, 100,000; corn, 40,000; oats, 40,000; hogs, 30,000 head. The leading futures ranged as follows:
